Worming Schedule

*Please check with your veterinarian before beginning a new worming schedule

	Name	Chemical Class	Treats
June	Strongid	Tetrahydropyrimidines	Pyrantel Embonates treat large roundworms, large redworms, small redworms, seatworms/pinworms and tapeworms (all species)
August	Equimectrin	Ivermectin	Removes worms and bots Large Strongyles, Small Strongyles, Pinworms, Ascarids, Hairworms, Large-mouth Stomach Worms, Bots, Lungworms, Intestinal Threadworms, and Summer Sores (caused by Habronema).
October	Equimax	Praziquantels	Praziquantels treat all three species of tapeworm
December	Quest Gel	Moxidectin Moxidectin is NOT recommended for foals or weak horses since an overdose can be very dangerous to them.	Macrocytic lactones treat bots, small redworms, large redworms and lungworms
February	Panacur Power Pac 5 Day Dose Rotation	Fenbendazole	Benzimidazoles treat roundworms, large redworms and small redworms
April	Equimax	Praziquantels	Praziquantels treat all three species of tapeworm

Equine Wormers: Wormers are divided into four different chemical groups:

1. Macrocytic lactones (Ivermectins and milbemycins), **Eqvalan**, **Equest**, **Eraquell**, **Bimectin**, **Vectin**, and **Equimax**
2. Benzimidazoles, **Panacur** (fenbendazole) **Telmin** (mebendazole)
3. Pyrantel Embonates, **Strongid P**, and **Embotape**
4. Praziquantel, **Equimax**, and **Equitape**

NB: only Panacur Equine Guard and Equest are licenced for the treatment of encysted L4 cyathostomes (small redworms).
